Karen Quinsey

PCOC Overview

Wednesday, 19th August
Training Room, AHSRI,
12:30 - 1:30pm
Light refreshments will be provided

The Palliative Care Outcomes Collaboration (PCOC) is a national program that utilises standardised clinical assessment tools to measure and benchmark patient outcomes in palliative care. Participation in PCOC is voluntary and can assist palliative care service providers to improve practice and meet the Palliative Care Australia (PCA) Standards for Providing Quality Palliative Care for all Australians. This presentation will describe the implementation of the program, present an analysis of the data received and discuss future directions for PCOC.

Karen Quinsey is a Senior Research Fellow at the Centre for Health Service Development. Karen has worked in the health system in occupational therapy, community health and health service improvement, as both a clinician and a manager. Her academic qualifications are in Occupational Therapy and Public Health. Karen has been at the Centre for about ten years working on a range of evaluation projects, including three national palliative care programs.
