Rob Gordon and Janette Green

The development of the Australian National Subacute and Non-acute Patient (ANSNAP) Classification Version 4

Wednesday, 23rd September
Training Room, AHSRI,
12:30 - 1:30pm
Light refreshments will be provided

This seminar will present the results of a project conducted by CHSD in 2014 that developed a revised version of AN-SNAP. AN-SNAP V4 is a casemix classification that comprises 130 classes and is designed to be suitable for both funding and clinical management purposes.

Robert Gordon’s full-time position at AHSRI supports research projects in sub and non-acute care, casemix development, community health classification and health financing. Rob undertakes the day to day management of the Institute and directly manages many of its projects.

Associate Professor Green is the Director of the Centre for Applied Statistics in Health within AHSRI. She has extensive experience in teaching and classification development. She has undertaken a substantial amount of work with assessment tools, particularly in the area of children with disabilities and has developed casemix classifications in a number of other areas such as disability, mental health and ambulatory sexual health care.
