Professor Fabrizio Carinci  
Professor of Health Systems and Policy, University of Surrey  

SEMINAR ON OECD HEALTH CARE QUALITY INDICATORS  
29 February 2016, 10:30-11:30am  
AHSRI, Enterprise 1, Innovation Campus  

OECD HEALTH CARE QUALITY INDICATORS AND RELATED INTERNATIONAL PROJECTS:  
Methodological advances, new challenges and the future of health statistics.  

The OECD is a leading organization in the international measurement of health system performance. The OECD Expert Group on Health Care Quality Indicators has recently revised the performance framework, identifying core indicators and highlighting new directions. Although improving, the capacity of countries to deliver a broad range of standardized indicators still needs to be fostered.  

In his talk, Professor Carinci will present recent developments in OECD projects.
