## Title

Towards a placed based model for Aboriginal community-led solutions

## ABSTRACT

This seminar will outline the program of collaborative research being undertaken by the multi-disciplinary Aboriginal Health Team. The team is working towards the development of a multifaceted explanatory model of how Aboriginal community controlled organisations contribute to health improvements for Aboriginal people within south eastern New South Wales. Building on our work within the region over a number of years we aim to develop a better understanding of Aboriginal developed models of care, how they are embedded in Country and Community and how they achieve improved health outcomes, in order to will provide evidence and improved understanding for using and adapting Aboriginal place based models of care to progress Aboriginal and Torres Strait Islander health in the future.
